

## SHORT INTRODUCTION TO NATURAL CELLULAR DEFENSE

2006 March

To find out more about Natural Cellular Defense *activated liquid zeolite detoxifier*, a new breakthrough in nutrition technology which excels in it's ability to remove heavy metals and toxins from our bodies, go to: <http://www.mywaiora.com/475030> or contact Phillip W. Warren at: [phillip\\_warren@telus.net](mailto:phillip_warren@telus.net) . For more information on Natural Cellular Defense and many other health topics go to [www.rebprotocol.net](http://www.rebprotocol.net) access the information there. Phone and voice mail: (604) 946-4919

Waiora's new product, **Natural Cellular Defense** is so unusual, unique, and dynamic that there are internationally renowned health professionals in the wellness community saying things like, **"This may well be the single most profound breakthrough in health of our time."**

Hello and welcome to this call. My name is **Winder Lyons** (<http://www.windersight.com>) and over the next few minutes I'll be introducing you to this revolutionary, breakthrough product, **Natural Cellular Defense** or **NCD**. So what is this amazing new stuff? How does it work, what makes it unique? First of all, NCD is a type of mineral called a Zeolite. Zeolites form when lava and ash contact water. They are unusual in that they are one of the few naturally-occurring, negatively-charged minerals. They have a **honeycomb, cage-like structure** and they magnetically attract and capture toxins—anything with a positive charge and the right size or configuration – like heavy metals or insecticides.

Now, zeolites are not new. When the Chernobyl disaster occurred, the Russian government dumped tons of zeolite on the site to absorb the toxicity. Zeolites have been used in agriculture for over 40 years and are listed on the U.S. government's GRAS (or Generally Regarded as Safe) list. NASA has used zeolite in air filtration, and in Asia, Russia, India, and China zeolite has been used for centuries to promote better health.

So, **why is NCD unique and new?** A biochemist, **Harvey Koffman**, spent 13 years researching this particular zeolite and he figured out how to clean and activate the mineral, how to get it small enough to travel to all parts of our body, and how to get it into a liquid form. Koffman patented this process, so **Waiora now has the exclusive distribution rights to a product that has never been available to humanity before in this form.**

In your body, NCD will attract and capture heavy metals, insecticides, pesticides, herbicides, certain molds and fungus, nitrosamines, and more. Any substance with the right charge and size will be captured and removed safely from your body, mostly through the kidneys.

NCD is classified as a nutritional substance – that's almost inaccurate. Natural Cellular Defense adds no appreciable nutrition to your body. It is, simply put, an amazingly **profound cleaning**

**agent.** The molecules of zeolite go into your body clean and they come out dirty. This product has a measurable and classifiable mechanism of action.

**So what happens in your body when you take the NCD? There are three things that we can say that NCD will help with:**

1. **It is a powerful, yet safe, detoxification agent.**
2. **It will help the body balance its pH.**
3. **It facilitates a balanced and properly functioning immune system.**

The downstream consequences and results of these three things are varied and profound.

**Number 1. Detoxification.** Let's talk about the first part, **Detoxification.** We live in a "toxic soup." Our air, food, and water are contaminated. We are in contact with a vast array of toxins on a daily basis. **According to the EPA there are about 70,000 chemicals used commercially in the U.S. and of those, 65,000 are potentially hazardous to your health.** The Environmental Defense Group tells us that four billion pounds of toxic chemicals are released into our environment every year and that 72 million pounds of those are known carcinogens. No one knows what happens when these toxic materials interact with each other and form new and potentially hazardous compounds, so the **air we breathe, the water we drink, and the foods we eat can be dangerous to our health.** There are some health professionals that believe as much as 95% of all diseases are caused or made worse by toxicity. There was a study done recently testing the blood from the umbilical cords of newborn humans, and what was discovered was chilling – hundreds of toxins, many of which were known to be carcinogenic were discovered. So **our babies are being born with a toxic load.**

[an additional source from PWWarren: Research by the Environmental Workers Group (EWG) has shown that our bodies are loaded with substances which seriously compromise our health (see "The BodyBurden: The pollution in newborns" available at <http://www.ewg.org/reports/bodyburden2/contentindex.php> and full 83 page report at [http://www.ewg.org/reports\\_content/bodyburden2/pdf/bodyburden2\\_final-r2.pdf](http://www.ewg.org/reports_content/bodyburden2/pdf/bodyburden2_final-r2.pdf) ]

In other detox programs detoxification agents are introduced into your body, causing the cells to discharge stored toxins. Your body must then act as a filter for the newly-released toxicity. This process can have dangerous consequences, including possible damage to your kidneys, liver, bladder, and more. That's not so with Natural Cellular Defense.

The NCD magnetically captures the toxins and carries them safely out of your body. NCD is not metabolized by the body, it does not store in the body—and once it grabs toxins, it never lets go unless it encounters something even more toxic – then it will exchange for the more toxic element. It is important to note that NCD will not remove needed nutrients from your body, only toxic substances.

**Number 2. Balancing the pH.** NCD helps the body balance the pH, not by adding alkalinity, but by **removing the things that are acidic** or moving the acidic materials to a more appropriate

place in your body. Now It's common knowledge that most diseases will not live and cannot thrive in a balanced pH or alkaline environment. Disease needs an acidic environment, as do bacteria, viruses, candida, parasites, molds, fungus, and more.

**Number 3. Balancing immune function.** The other benefit of using NCD is the support it gives to a properly functioning immune system. Once the toxic load has been removed and the pH is balanced, the immune system is supported and allows it to function better. **The NCD seems to act as an immuno modulating agent.** In other words, if your immune system is overactive (which is the problem with autoimmune disorders), it quiets down, or if it's underactive, it boosts up.

Another important point that needs to be made about NCD is that the product **will help your body to better utilize nutrition. Fifty percent of the people in the U.S. use supplements.** Unfortunately, very little of what they take works because of either poor quality nutritionals or the inability of the body to uptake the nutrients. The **Natural Cellular Defense will help to clear the toxicity off the nutritional receptor sites in your body, thereby allowing better utilization of nutrients.** NCD is safe for anybody – pregnant women, nursing mothers, and newborn babies.

I believe what we are offering people is a product that is incredibly helpful and amazingly hopeful, and when someone gets that, it gives them a true sense of empowerment. They are empowered to be able to do something positive to promote not only their own better health, but the health and well being of those they love.
